

I just found out that the NAB is trying to pass a law to stop XM Radio from having their Instant Traffic & Weather Stations. I don't think it's fair that you might consider this. This station is very useful for me since I live in Los Angeles. Traffic reports in L.A. are pretty bad, they come on every once in a while and they leave out some places some times. Sometimes I hear that their's been an accident and when I get to that place there isn't anything going on. With XM, I have never had a problem, they are always on top of everything. I pay for this service and I think it should be able to stay on the air. The other day I found out one of the most important reasons why these stations should stay. The other day I was scanning through the XM stations to get to the L.A. Weather & Traffic Station and I happened to come across the Tampa Weather & Traffic Station and they had an Amber Alert going. It was broadcast over XM radio and when I went to the display it even had the license plate. Wow, I thought that alone was well worth paying for these stations. When I see the light boards on the freeways it's so hard to remember the license plate number, but now I can have it right in front of me. Please consider this so that we can keep the Traffic & Weather station on XM Radio. Thank You.
